This powerful vocal quintet performs original compositions devoid of musical or linguistic limitations.

Mahna is a truly complete show, with a strong physical presence, minimalist and creative staging enhancing the singers and the stories, and forceful inventive singing.

The raw beauty of the voices, using real or invented languages, is the essential element of the compositions.

« This show is a celebration, an incantation, an ageless, nameless ritual. Within you everything sings and dances and hits and punches... »

« A moment of grace and pleasure, where voices sculpt space and re-enchant the world. »

« Congratulations on the authenticity of your creative effort, and particularly on the "sacredness" that springs from true emotion. Through this creative honesty you forge your own style and renew the language of singing together...»
